ABOUT US

VISION

“Growing Your Value, Together.”
 “LEADING TOWARD A GREENER CHEMICAL WORLD,
 WITH TRUST.”

MINJIN CORPORATION LTD. pursues long-term partnership and mutual growth through our experiences and experts.

ESTABLISHMENT

Founded in 2011, MINJIN CORPORATION LTD. in the wholesale distribution of petrochemical products and chemical materials. Through close partnerships with leading South Korean chemical companies, including Lotte Chemical, Kumho P&B Chemicals, and Hanwha Solutions, we have established ourselves as a reliable trading hub, supplying high-quality chemical products to major global markets across South Asia, the Middle East, Europe, the United States, Southeast Asia, and China.

We strive to achieve our vision: “Leading toward a greener chemical world with trust, we aim to create sustainable value and contribute to human life.”

PRODUCT

Glycols and Glycol Ethers

Glycols and glycol ethers are used as raw materials for resins, fibers and films, and as antifreeze agents, refrigerants, plasticizers and solvents. Applications include coatings, adhesives, inks, cleaning agents, cosmetics and industrial oils.

1/2
PRODUCTS LISTED
APPLICATIONS

Glycol ethers serve as solvents in water-based coatings, printing inks and cleaning formulations. NPG is a building block for polyester resins used in powder coatings.

PRODUCT

Glycols and Glycol Ethers

Glycols and glycol ethers are used as raw materials for resins, fibers and films, and as antifreeze agents, refrigerants, plasticizers and solvents.

2/2
PRODUCTS LISTED
APPLICATIONS

Glycols are widely used as essential raw materials in a variety of industries, including polyester and PET manufacturing, antifreeze and coolants, solvents, coatings, and personal care products.

PRODUCT Plasticizers

Plasticizers increase the plasticity or fluidity of the materials they are added to, such as plastics, cement, concrete, wallboard and clay. They are also used in leather, PVC films, electrical wires and automotive interiors. In flexible PVC they adjust softness and processing characteristics, with typical uses in flooring, wall coverings, synthetic leather and cable insulation.

PRODUCT Acrylates & Methacrylates

Acrylate is used as a raw material for adhesives, coatings, plastics and emulsions. Acrylic monomers are building blocks for polymers used in paints and pressure-sensitive adhesives. MMA is a raw material for acrylic resins; PMMA applications include transparent sheets, signs, lighting covers and display components.

PRODUCT

Solvents

Solvents dissolve resins and support their application in coatings, inks and adhesives. Acetone also serves as a chemical intermediate for acrylic plastics, polycarbonates and epoxy resins.
